

Monthly CREW Update: September 2009

- 1.** NREL's National Wind Technology Center is hosting a workshop on Wind Turbine Condition Monitoring on October 8 and 9. There is no registration fee for the workshop, but all participants must register no later than September 30. For more information, go to http://www.nrel.gov/wind/meeting_20091008.html
- 2.** The first seminar of our monthly CREW seminar series will be held on October 29 at 3:30pm in Room ECCS 1B28 in the Engineering Center at CU-Boulder. Katie Johnson (CREW CSM Site Director) is chairing the CREW seminar series this year. We will send out another announcement with the title and abstract for the seminar after we have confirmed things with our first speaker. Refreshments will be provided starting at 3:15pm. Please mark your calendars and plan to attend. We are also exploring ways to broadcast the seminar to CSM, CSU, and NREL.
- 3.** We have hired Tanvi Shah as an Earn-Learn student. Earn-Learn is a program in the CU-Boulder College of Engineering. Tanvi is working with Pat Moriarty (CREW NREL Site Director) and Florence Bocquet (CREW Managing Director) to develop a more extensive CREW website than what we have thus far at <http://www.coloradocollaboratory.org/crew.html>
- 4.** Our first CREW RFP for shared research will be issued in the next two weeks. Proposals are expected to include a cover page, a 2-page project description, 1-page bios of each investigator, and a 1-page budget summary. Proposals will be due around November 16, 2009. Stay tuned!
- 5.** There is an Assistant Professor opening at the University of Rhode Island in the Department of Electrical, Computer, and Biomedical Engineering. More information about the position and how to apply can be found at: <http://www.ele.uri.edu/advert.pdf> Please pass this on to interested PhD students and postdocs. Again, when we have our CREW website more developed, we will ultimately post job announcements we receive there.
