

## **Monthly CREW Update: January 2010**

Here is a brief update on our recent and upcoming activities.

1. Andy Paliszewski from Siemens will be giving our next CREW seminar on January 25, 2010 at 2pm in Room ECCS 1B28 on the CU campus. (This is the same room as for the first CREW seminar in December 2009.) Andy will discuss Siemens Wind R&D Plans for Boulder. Go to

[http://crew.colorado.edu/Newsroom/Events/2010Spring\\_Seminar1\\_AnyPaliszewski\\_Siemens\\_Jan25.pdf](http://crew.colorado.edu/Newsroom/Events/2010Spring_Seminar1_AnyPaliszewski_Siemens_Jan25.pdf) for further information about the seminar. Attached are some directions to the seminar room. While we highly encourage students, faculty, and researchers to come attend the seminar in person, we realize that this may not always be possible for those who live or work further away from Boulder, and hence the seminar will also be broadcast at the following URL:

URL: <http://dimdim.cs.colorado.edu>  
Meeting Code: CREW1252010

2. Sandy Butterfield, who is now the CEO of Boulder Wind Power, will be our CREW seminar speaker at 2pm on Monday, February 22. In general, our CREW seminars this semester will be held at 2pm on the last Monday of each month (January 25, February 22, March 29, and April 26). Further details on Sandy Butterfield's and the other upcoming CREW seminars will be distributed and posted as soon as we have the information on our CREW website at <http://crew.colorado.edu>

3. Please alert interested students and others to the following opportunities:

a. While this was already sent out in a separate CREW email, the application target date of January 22, 2010 has not yet passed. Please see the attached RFP for applicants for a Research Position with NREL's National Wind Technology Center on Windplant Systems Engineering Analysis and Optimization.

b. CSU is searching for new faculty in the smart grids area. The job description can be found at at:

<http://www.engr.colostate.edu/faculty-staff/positions.html>

If you have graduate students you think might fit well with these positions, please encourage them to apply. While the application target date of August 15, 2009 has already passed, Peter Young (CREW CSU Site Director) has assured me that they are still reviewing applications for up to 3 faculty positions in the smart grids area.
